

# How to get a UK or Swedish IP address

With Hidden24, you can also get a UK IP-address or a Swedish IP-address (in addition to the US IP-address you get by default). An IP-address from the UK can for example be useful if you want to watch UK Netflix, or access other services that require a UK IP address.

All of the country options are equally safe, and will protect you from online threats and guard your privacy.

## Create an additional VPN-connection for each country (here we are using the UK as an example)

Create **one more VPN-connection** (a second connection), by following the installation guide one more time, but with **two differences** in the process.

- Difference 1: Give the new VPN connection a different name, for example "**Hidden24 UK**" instead of just "Hidden24"
- Difference 2: Use the server address "**uk.hidden24.com**", instead of "connect.hidden24.com".

Apart from these two differences, everything else should be the same. Same Username and Password, same shared secret / PSK.

Repeat the process one more time if you also want a Swedish IP address, but name the connection "Hidden24 SE", and then use the server address "**se.hidden24.com**".

## How do I choose which IP-address to get connected to?

**Simple:** When you want a US IP-address, activate the first connection named "Hidden24". When you want a UK IP-address, activate the other connection named "Hidden24 UK". For a Swedish address, activate "Hidden24 SE".

You can switch between all of them, by activating and deactivating each connection.

## Summary, countries

These are the countries available to you. This table will be updated as we add new countries in the future.

Get IP-address from this country	Country code	Suggested name of connection	Server address for the VPN connection
USA	US	Hidden24	connect.hidden24.com
United Kingdom	UK	Hidden24 UK	uk.hidden24.com
Sweden	SE	Hidden24 SE	se.hidden24.com
